

BIN SCALE

Bin Scale Weighing System

- Accurate feed inventory and consumption in real time, at all times

Advantages

- Improves your performance by preventing “out of feed” events
- No more safety risk with climbing bin
- Offers accurate data of feed conversion
- Easy to use

Features

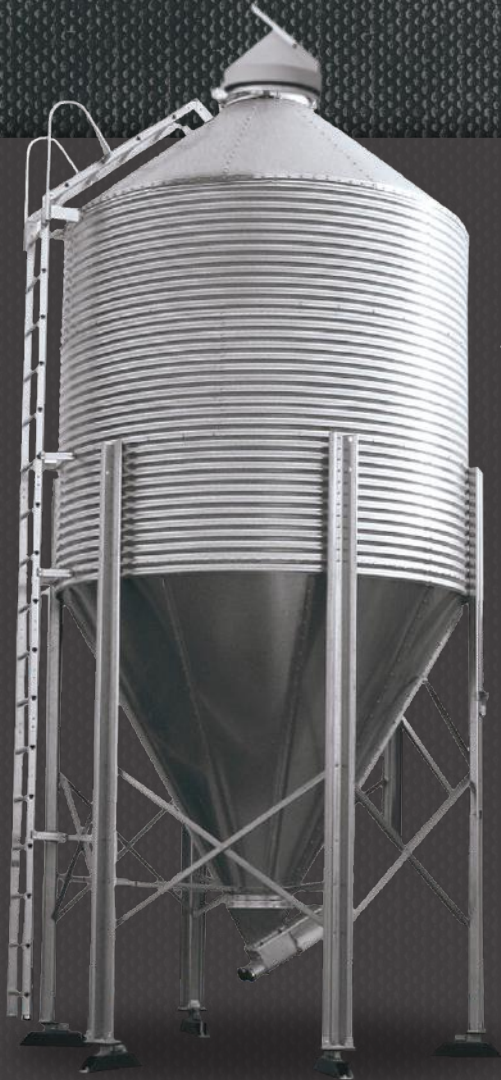

- Up to 4 feed bins on one control unit
- Adapts to 4, 6, or 8 leg bins
- Historical information is available for:
 - Daily consumption
 - Feed deliveries
 - Feed remaining
- Set maximum run time for feed augers:
 - Shut off auger
 - Automatically switch to an alternate feed bin if available
- Alarms
 - Low feed level in bin
 - Maximum run time
- USB port for backup and update

BIN SCALE

*Live remote access to your controller
and data history so you can make
informed decisions 24/7.*

Accuracy

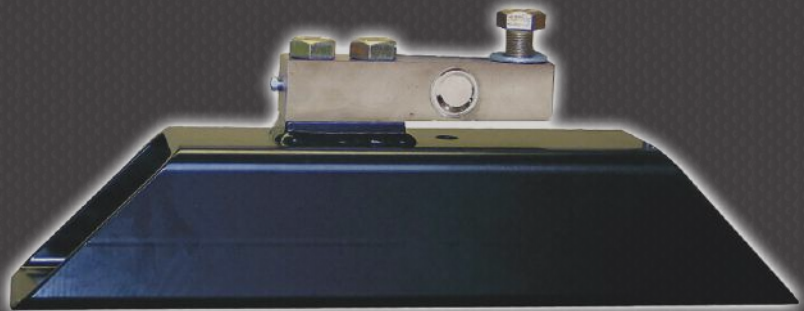

- High accuracy and durable to withstand climate variations
- Improved built-in logic for more accuracy

Optional Remote Access

- Complete remote access in real time via Internet (Computer)
- Automatically forwards graphs and reports by email
- Data history

Installation

- Heavy duty construction
- Load Cell sits 4.5" off the bin pad, keeping it away from ice and other debris
- Needs to be installed on a level concrete pad
